Summary

Software Engineering undergraduate specializing in **Full Stack Development and AI Engineering**, with hands-on experience in **Java, Python, React, FastAPI, and Spring Boot**. Built **Generative AI and workflow automation** applications using **LangChain, LangGraph, RAG, and PostgreSQL**, with experience in cloud deployment and RESTful API development.

Technical Skills

Languages: Java, Python, JavaScript, C
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Backend & APIs: Spring Boot, Node.js, FastAPI, REST APIs, WebSockets, Spring Security
AI Engineering: LangChain, LangGraph, Generative AI, RAG, Google Gemini, Pinecone, Vector Search
Databases: PostgreSQL, MySQL, Redis
Cloud & Tools: Netlify, Vercel, Render, Neon, Git, GitHub, Postman, Resilience4j

Work Experience

Tech Intern — React, Node.js Dec 2024 – Feb 2025
Beiyo Technven Pvt. Ltd. *Indore, India*

- Standardized **React.js–Node.js API integration** by documenting **REST endpoints and communication contracts**, improving codebase maintainability and reducing **developer onboarding time by ∼30%**.
- Refactored and deprecated **15+ redundant backend API routes**, streamlining request handling, reducing API latency under load, and improving backend scalability.

Projects

PlacementOS — AI Recruitment Automation — *Next.js, FastAPI, LangGraph, PostgreSQL* **Live Link**

- Engineered a **FastAPI + LangChain + LangGraph** backend with **Google Gemini 2.5 Flash** for structured JD extraction (**∼3.1s extraction, 14 provenance locators**) and durable **human-in-the-loop approval workflows** with PostgreSQL checkpoints.
- Built a **Next.js 15 (React/TypeScript)** full-stack portal with **role-based access control (RBAC)** across **23 authenticated routes**, enforcing **tenant-scoped authorization** at every API and service boundary.
- **Automated the end-to-end recruitment lifecycle:** JD intake → **AI extraction** → coordinator approval → **deterministic eligibility evaluation** → **asynchronous email dispatch** → drive closure.

Debrief.io — AI Meeting Intelligence Platform — *Spring Boot, FastAPI, RAG, Pinecone* **Live Link**

- Architected a **cloud-deployed AI application** using **Spring Boot REST APIs, Python/FastAPI microservice, and PostgreSQL**, orchestrating a **4-stage meeting intelligence pipeline** across Netlify, Render, and Neon.
- Integrated **Google Gemini File API** for meeting transcription and processing, reducing Python microservice memory usage by **∼94%** (600MB+ to ∼35MB) and **eliminating upload timeout failures**.
- Developed a **Retrieval-Augmented Generation (RAG) chatbot** using **Pinecone vector search and semantic retrieval**, reducing unnecessary API calls by **∼35%** through intelligent query classification; automated detection of **superseded meeting decisions**.

AlgoClash — 1v1 Live Coding Battle Platform — *Spring Boot, React, WebSockets, Resilience4j* **Live Link**

- Built a **real-time 1v1 matchmaking and tournament engine** using **Spring Boot and STOMP WebSockets**, matching players within **±100 Elo in under 2 seconds** and automating bracket progression for **8-player tournaments**.
- Engineered an **asynchronous code execution pipeline** for Java and C++ using **Resilience4j** with **3 retries, a 5-failure circuit breaker, and 30s cooldown**, integrating a **containerized JDK fallback** to prevent submission loss during API outages.
- Developed a **responsive React 19 frontend** with **Monaco Editor**, implementing **STOMP WebSocket updates** with a **1.5s polling fallback** for reliable, real-time code verdict delivery.

Education

Shri G.S Institute of Technology and Science Expected Jul 2028
B.Tech in Information Technology — 8.23 CGPA *Indore, MP*
Bharatiya Vidya Bhavan's Prism School 2024
CBSE X — 96.8% CBSE XII — 93.4% *Satna, MP*

Achievements

- **ICPC Regionalist 2026** – Qualified for both **Amritapuri and Chennai Regionals**.
- **Competitive Programming** – **Knight** on LeetCode (1850+ rating) and **3-Star** on CodeChef (peak rating).
- **Hackathon Finalist** – Finalist at **Mastercard Code for Change 3.0** – 12 Hours Onsite Hackathon @ Pune Office.
