Professional Summary

Software Engineering undergraduate with hands-on experience building **responsive web applications**, **RESTful APIs**, and reliable real-time systems using **HTML, CSS, JavaScript, React, Java, Spring Boot, and Node.js**. Strong foundation in **object-oriented programming, Java, data structures**, and collaborative software development.

Education

Shri G.S. Institute of Technology and Science (SGSITS) — Expected Jul 2028
B.Tech in Information Technology — CGPA: 8.23 — *Indore, India*

Bharatiya Vidya Bhavan's Prism School — 2024
CBSE Class X: 96.8% CBSE Class XII: 93.4% — *Satna, India*

Technical Skills

Programming: Java, C, JavaScript, Python
Web & UI: HTML5, CSS3, React, Tailwind CSS, Responsive Web Design, WebSockets
Backend & Databases: Spring Boot, Node.js, REST APIs, JWT, Redis, PostgreSQL, MySQL
Tools & Concepts: Git, GitHub, Postman, Object-Oriented Design

Work Experience

Software Development Intern — Beiyo Technven Pvt. Ltd. — Dec 2024 – Feb 2025
React.js, Node.js, REST APIs — *Indore, India*

- **Developed and standardized React.js–Node.js API integrations** through documented endpoint contracts and clearer code organization, reducing **developer onboarding time by approximately 30%**.
- **Refactored 15+ redundant server routes** to simplify request handling, improve maintainability, and reduce **API latency under load**.

Projects

AlgoClash — Real-Time Coding Battle Platform — **Live Link**

- **Developed a responsive React 19 interface** with Monaco Editor, STOMP WebSocket updates, and a **1.5-second polling fallback** for reliable code-verdict feedback.
- Built an **object-oriented Java/Spring Boot matchmaking engine** pairing players within ±**100 Elo in under 2 seconds**, with automated progression for **8-player tournaments**.
- Engineered an **asynchronous Java/C++ code-execution workflow** using Resilience4j retries, circuit breaking, and a containerized JDK fallback to handle external execution-service failures.

Debrief.io — AI-Powered Meeting Assistant — **Live Link**

- Designed a **Spring Boot REST API** coordinating a **4-stage AI workflow** across Netlify, Render, and Neon, integrating user-facing meeting analysis with backend services.
- Replaced local transcription processing with **Google Gemini File API**, reducing microservice memory usage by **approximately 94%** and eliminating upload timeouts.
- Built a **RAG-based chatbot** with Pinecone vector retrieval and query classification, reducing unnecessary API calls by **approximately 35%**; added decision-drift detection.

Prep LC — Company-Wise DSA Repository — **Live Link**

- Built a **Spring Boot REST API** with filterable problem listings and **JWT-based authentication** for secure application access.
- Implemented **Redis caching** to reduce API response latency by **40–60%** under load.
- Improved the **web user experience** with custom pagination and lazy loading, decreasing page-load time by **approximately 30%** and reducing client-side memory use.

Leadership & Collaboration

- **Placement Coordinator, SGSITS Placement Committee:** Coordinated recruiter sessions and placement activities with student teams and stakeholders, managing schedules, communication, and execution under strict deadlines.
- **Pre-Placement Test Series (PPTS), SGSITS, Indore:** Prepared HackerRank programming assessments, problem statements, and test cases; delivered **error-free 9 Week test content** through careful review.

Achievements

- **ICPC Regionalist 2026:** Qualified for the Amritapuri and Chennai Regionals.
- **Competitive Programming:** LeetCode Knight (1850+ rating); CodeChef 3-Star (peak rating).
- **Hackathon Finalist:** Mastercard Code for Change 3.0, 12-hour onsite hackathon in Pune Office.
